-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Objections***

Claim 4 is objected to because it depends from a claim that is not currently pending in the application. Accordingly, the examiner has assumed that claim 4 depends from claim 5 in order to further the prosecution of the application. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

Claims 3 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Recitations such as "a plurality of shelf positions" on lines 4-5 of claim 3 render the claims indefinite because it is unclear what the applicant is attempting to set forth. What comprises a shelf position? Is the applicant referring to rotational position of the shelf? Recitations such as "the pen" on line 3 of claim 4 render the claims indefinite because they lack antecedent basis.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3634

Claims 1, 2 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Twellmann. Twellmann discloses a rotary shelf mechanism comprising: a post 10; at least one shelf 12 connected to the post, the post having pin-receiving apertures 57 proximate the at least one connected shelf, each of the at least one shelf having a post-encircling sleeve 42 including an operably connected pin-receiving indent 58; and a pin 56 extending through the post-receiving apertures and being cooperatively received by the pin-receiving indent of the at least one shelf to secure the at least one shelf to the post, the shelf has a post receiving opening (not numbered, but shown in the figure), the pin receiving indent is a rectangularly shaped recess since it has a general shape of a rectangle as shown in the figure, the post includes a plurality of pin receiving apertures 57.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Twellmann as applied to claims 1, 2 and 6 above, and further in view of Mitts et al. Twellmann is silent concerning a vertically adjustable post.

However, Mitts et al. disclose a rotary shelf mechanism having a vertically adjustable post 30.

Art Unit: 3634

It would have been obvious to one of ordinary skill in the art to provide Twellmann with a vertically adjustable post, as taught by Mitts et al., to enable the post to fit in various sized cabinets.
